MULTIPLE REFLOW CYCLES AND MOISTURE RESISTANCE

All Everspin packages are qualified by the procedure defined in IPC/JEDEC joint specification IPC/JEDEC J-STD-020D.1. They are guaranteed to withstand up to three reflow cycles without permanent damage, provided the conditions for the rated moisture resistance level for the part are observed prior to reflow.

Everspin parts are generally rated for MSL Level 3. Exceptions may exist and are noted in their respective data sheet. Please check the latest individual product data sheet to confirm the rated

MSL for the prod-uct.

RECOMMENDED REFLOW TEMPERATURES AND TIMING - ALL PACKAGES

Everspin products can be assembled using a standard reflow profile. The profile below is based on IPC/ JEDEC J-STD-020D.1.
