

Everspin to Showcase MRAM Solutions at Embedded World 2016

Everspin will display a range of customer solutions and technologies at Embedded World 2016.

Chandler, AZ, February 16, 2016 — Everspin Technologies, Inc., the world's leading developer and manufacturer of discrete and embedded MRAM, today announced that it will showcase a range of MRAM solutions in booth 449 in Hall 4A at the upcoming Embedded World conference in Nuremberg, Germany on February 22-24. Everspin is displaying the following:

- Customer implementations of Everspin's MRAM components embedded on board-level solutions, including Industrial PLC, RAID, Smart Meter, Engine Control and Gaming
- A demonstration of a customer's casino game that leverages MRAM
- An expanded line of qualified products for the automotive industry, including a new 16 Mb MRAM component that meets the stringent temperature requirements for this market
- An Arduino development board featuring full Quad SPI with ST's Nucleo Microprocessor
- A video demonstrating GLOBAL FOUNDRIES manufacturing Everspin's ST-MRAM.

"Everspin has made great strides in the marketplace during the year since the last Embedded World show, and we are proving it by showcasing a range of MRAM solutions in a new, expanded booth at this year's conference," said Phill LoPresti, president and CEO of Everspin. "Developers looking for fast, non-volatile memory with virtually unlimited endurance and data retention can come to our booth and see a wide variety of real-world implementations that will spur their own design ideas."

About Everspin Technologies

Everspin Technologies is the worldwide leader in designing, manufacturing, and commercially shipping discrete and embedded Magnetoresistive RAM (MRAM) and Spin-Torque MRAM (ST-MRAM) into markets and applications where data persistence and integrity, low latency, and security are paramount. With over 40 Million MRAM and ST-MRAM products deployed in data center, cloud storage, energy, industrial, automotive, and transportation markets, Everspin has built the strongest and fastest growing foundation of MRAM users in the world. With an intellectual property portfolio of more than 500 active patents and applications, Everspin leads the market in development of both in-plane and perpendicular magnetic tunnel junction (MTJ) ST-MRAM bit cells. Everspin has established high-quality manufacturing worldwide, along with enabling a full turn-key 300mm high-volume foundry partner for advanced technology nodes including 40nm, 28nm and beyond. In addition to launching discrete memory solutions with new densities and advanced interfaces, including the world's first commercialization and volume shipments of ST-MRAM, Everspin is delivering on the company's strategy to proliferate MRAM and ST-MRAM as mainstream embedded memories for use in MCUs, GPUs, DSPs, Application Processors, and ASICs, earning Everspin its description as "The MRAM Company". www.everspin.com
